First of all a special thank you needs to go to First Responder Rick Rosenfeldt, Fire Lieutenant-First Responder Eric Kitowski, Chairman Randy Leiker and Town Administrator Dave Tebo for their efforts for making this possible.

After the beams arrived in Kaukauna just 3 days before our parade we wanted to escort them through all the towns between Kaukauna and Greenville. We e-mailed every local Fire/EMS and police department asking if they wanted to help with the escort. The response was more than we expected. All the towns we went through wanted to lead the escort through their town then fall back in line. We also invited Gold Cross Ambulance and Theda Star to be a part of the escort , they were both honored to be invited.

On the day we welcomed the beams to Greenville I wish everyone could have had the privilege to ride along with us. If anyone had thought that people where starting to forget, nothing could have been farther from the truth. We witnessed veterans salute with tears in their eyes. Adults and children a like were waving flags some cheering but some were solemn reflecting on what had happened those 10 years ago as we passed by.

I hope everyone has the opportunity to come down to the fire station on August 25<sup>th</sup> to see the unveiling of our new Memorial. I am sure this will make our town of Greenville and the New York Port Authority very proud.

# 2011 Events we Participated

- Lions Catfish races and Concert
- Parade and Bike give away followed by the Fire/EMS Concert (Bill Tesch Memorial Concert)
- Helped plan the mock disaster at the Airport
- Fire/EMS Open House
- Sheriffs Department Night Out
- Country Crossings Community Day
- Public Educational Presentations

# Associations

- Fox Valley Regional Trauma Advisory Council
- EMS Chiefs Association
- Wisconsin EMS Association

We are also proud to work with Outagamie County Airport Fire, Theda Star And Gold Cross

# CCR is our new CPR

Earlier in the year our Medical Director Dr. Mark Westphal explained that we would be starting CCR (cardio-cerebral Resuscitation) instead of CPR. The difference between CCR and CPR is if we witness the arrest we hook up our AED and analyze immediately. If we don't witness an arrest, we start With compressions of at least 100 per minute and at least 2 Inches in depth without breaths. We check for airway obstruction and then place a non-visualized airway (combi tube). We attach our AED and let it analyze our patient, if instructed to continue CPR we would give a ventilation every 10 compressions.

This is a change from our normal but is approved by Dr. Westphal and will probably be taught this way in the near future.
